

[illegible]

Figure 1 is a schematic diagram of the experimental setup. It shows a subject seated at a table, looking at a screen. On the screen, there is a starting position (a large circle) and a target (a small circle). The subject's hand is positioned at the starting position. The screen is labeled 'Screen' and the hand is labeled 'Hand'. The starting position is labeled 'Starting Position' and the target is labeled 'Target'.

The diagram illustrates the experimental setup. A subject is seated at a table, looking at a video screen. A camera is positioned above the screen to capture the subject's view. A light source is positioned to the left of the screen to illuminate the scene. The subject is viewing a video screen that displays a target. The camera is positioned above the screen to capture the subject's view. The light source is positioned to the left of the screen to illuminate the scene.

$$\|u_{\delta}^{\varepsilon}\|_{L^2(\Omega)} \leq C \left(\|\tilde{u}_{\delta}^{\varepsilon}\|_{L^2(\Omega)} + \|\tilde{u}_{\delta}^{\varepsilon}\|_{L^2(\Omega)} \right)$$
